3. APPLICANT:

Name: Town of East Granby - Parks + Recreation

Address: 9 Center St. East Granby

Phone: 860 653 7660

Email Address: AliciaV@egtownhall.com

Applicant's signature: Alicia VanNess

4. OWNER(S) IF NOT APPLICANT:

Name:

Address:

Phone:

Email Address:

Owner's signature:

5. OWNER OR APPLICANT AGENT:

Agent Name:

Company Name:

Address:

Phone:

Email Address:

Agent's signature:

6. Purpose and description of proposed activity:

7. Description of Land Parcel:

Total parcel area:

Total area of wetlands on parcel

Total area of watercourses on parcel:

Acres of wetlands to be disturbed:

Lineal length of watercourse to be disturbed:

Acres of Upland Review Area Disturbance:

Does the proposed activity have the potential to disturb wetlands/watercourses on an adjoining property? Yes  No

Vernal pools to be disturbed? Yes  No

Will there be an effect on existing watercourse flow or lake/pond level:

Is water retention from storms/run-off possible on this parcel? Yes  No

If wetlands/watercourses are to be disturbed by proposed activity, what actions will be taken to compensate for their loss?

If your activity is found to be a significant activity, please explain what prudent and feasible alternatives were considered as part of your development plan:

8. In accordance with Section 7.6 of the IWWA Regulations please include the following information with your application. You may indicate Not Applicable where appropriate. Responses should be included on a separate paper.

- site plans for the proposed activity and the land which will be affected thereby which show existing and proposed conditions, wetland and watercourse boundaries, land contours, boundaries of land ownership, proposed alterations and uses of wetlands and watercourses, and other pertinent features of the land and the proposed activity, prepared by a professional engineer, land surveyor, architect or landscape architect licensed by the state, or by such other qualified person;

✓ engineering reports and analyses and additional drawings to fully describe the proposed activity including any filling, excavation, drainage or hydraulic modifications to watercourses and the proposed erosion and sedimentation control plan;

✓ mapping of soil types consistent with the categories established by the National Cooperative Soil Survey of the U.S. Natural Resources Conservation Service; the wetlands shall be delineated in the field by a soil scientist and the soil scientist's field delineation shall be depicted on the site plans;

a description of the ecological communities and functions of the wetlands or watercourses involved with the application and the effects of the proposed activity on these communities and wetland functions;

a description of how the applicant will change, diminish, or enhance the ecological communities and functions of the wetlands or watercourses involved in the application and each alternative which would cause less or no environmental impact to wetlands or watercourses, and a description of why each alternative considered was deemed neither feasible nor prudent;

analysis of chemical or physical characteristics of any fill material;

management practices and other measures designed to mitigate the impact of the proposed activity.
